DETAILED ACTION

Drawings

New corrected drawings are required in this application because they are informal.

Applicant is advised to employ the services of a competent patent draftsperson outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-3,8,10-13,18,20-23,28,30-33,38, and 40 are rejected under 35 U.S.C. 102(e) as being anticipated by Hamada (USPN 6,436,101). With respect to Claims 1,10,11,20,21,30,31,

and 40 Hamada discloses "an instrument for distracting a disc space between adjacent vertebrae and simultaneously preparing endplates of the vertebrae 451". "Instrument 451" having "a body 455 having an upper surface 457" and lower surface 471". Furthermore, "instrument 451" comprises "a first plurality of teeth 507 extending across the upper surface 457" and "a second plurality of teeth 521 extending across the lower surface 471" as best seen in FIG. 44. As to Claims 2,8,12,18,22,28,32, and 38, FIG. 37 shows the upper and lower surfaces 457,471 taper posteriorly such that the body has a thickness that decreases from the "anterior end 477" to the "posterior end 475". With regards the Claims 3,13,23, and 33 as best shown in FIG. 35, "the instrument 451", further comprises "an inserter 105" removably coupled to "the body 455".

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 9,19,29, and 39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hamada. Hamada discloses the claimed invention except for the upper and lower surfaces of the instrument taper from the anterior end to the posterior end at an angle of about 7 degrees. It would have been obvious to one having ordinary skill in the art at the time of the invention to design the instrument such that it decreased at an angle of about 7 degrees from the anterior end to the posterior end, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980).

Allowable Subject Matter

Claims 4-7,14-17,24-27, and 34-37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 11/21/03 have been fully considered but they are not persuasive. Applicant submits Hamada does not disclose any device having the required elements as stated on page 2, under the second section of Remarks in the line beginning "a first plurality of teeth....". Applicant further submits that surgical rasps 451 and 501 do not have teeth of any kind. Examiner submits that Hamada discloses an "upper surface 507" and a "lower surface 521 of the rasp 501 shown in Figure 44", which are provided with rasp surfaces.

Examiner further submits that the Webster New Riverside University Dictionary defines a rasp as a "coarse file with sharp, raised, pointed projections". These projections are considered to be teeth "angling back toward the anterior of the body". Applicant also submits that Hamada operates through a motion completely different from the ratcheting motion. However, Applicate only claims the structural features of the present inventions and does not claim a method of using the instrument/system. Therefore, the rejections of Claims 1-3.8-13,18-23,28-33, and 38-40 are sustained. Accordingly, the U.S.C. 103 rejections of Claims 9,19,29, and 39 are also upheld.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Candice C. Melson whose telephone number is (703) 305-8128. The examiner can normally be reached on 8:00am - 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Shaver can be reached on (703) 308-2582. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
